

# ENVIRONMENTAL COMPLIANCE ASSESSMENT, TRAINING, AND TRACKING SYSTEM (ECATTS)

## GENERAL INFORMATION

ECATTS is a web-based training and assessment system accessible from any computer with Internet access.

USAG-HI is using ECATTS to help you become familiar with our installation's sustainability goals and environmental stewardship requirements.

There are a number of environmental training modules available in the system. Most training modules can be completed in 30 minutes or less. **The “Sustainable Environmental Management (SEM)” training is mandatory for all USAG-HI military, civilians, tenants and contractor personnel.**

Depending on your responsibilities, the system will also identify other recommended training modules that you are encouraged to complete. In some instances, you may need more information than is contained in our training system. If so, contact your supervisor or the DPW Environmental Division SEM program. Your use of the system is kept confidential. We encourage you to use the system as often as you like as a reference tool for sustainability and environmental stewardship information.

## CREATE AN ECATTS ACCOUNT

**Step 1:** Go to the ECATTS website: <http://army.ecatts.com>

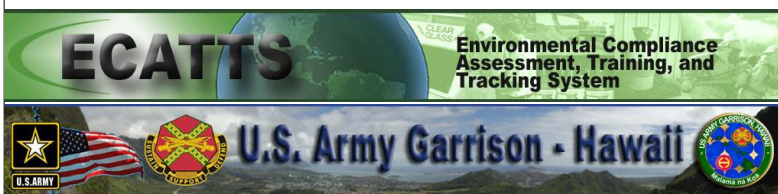

**Step 2:** Click **Enter**.

**Step 3:** At the **Welcome to ECATTS** screen, refer to the **REGISTER - New Users** box.

**Step 4:** Enter the registration password: **army** into the box. *(Note that the registration password is case sensitive – no caps).*

**Step 5:** Click **Create An Account**. This will take you through a series of registration steps.

**Step 6:** If you need help registering, click **ECATTS Technical Support** at the bottom of the **New Users** box. You can request to have the registration password be sent to you via email. You can also call the help desk 800 number (866-730-4253) for assistance.
